Presidential Ponderings

By EILEEN WETZEL

Happy New Year! I hope this newsletter finds you all well, safe, and shoveled out! I'm glad the Healeys are all snug and warm. It didn't start out that way. Late fall, Gary had brought the BJ8 to master body and paint artist, Bruce Bush, of Centuria, Wisconsin to have a blemish touched up. We went to pick it up on a Friday when the roads were nice and dry. The weather gurus were forecasting snow by late afternoon, so we'd be home by then. We'd just have to be careful not to visit too long.

Bruce and Kelley Bush are two of the nicest people you'll ever meet, as well as being amazing at their craft. We ended up staying just a little longer than we meant to, but should still have been in good shape to get home before the snow. By the time we got to 35W the flakes were flying. When we got to 694 it was stop and go pretty much all the way to Maple Grove. It was almost dark by the time we made it home to Plymouth.

We made it home safely, but the Healey was covered with salt. No problem, when the roads are dry. Just bring it into the garage at my work and wash it by hand. That's only four miles from home. Problem - the roads have not been dry since!

That hasn't stopped Gary from starting his winter projects. New tools and parts seem to arrive every week. We are putting off remodeling the bedroom for another year, so we can devote as much time as possible to the Healeys. Spring will be here before we know it! I hope to help out more this winter. I've been studying my terminology:

WIRE WHEEL BENCH GRINDER:

Cleans paint off bolts and then throws them somewhere under the workbench with the speed of light. Also removes fingerprints and hard-earned calluses from fingers in about the time it takes you to say, "Oh, shit!"

BELT SANDER:

An electric sanding tool commonly used to convert minor touch-up jobs into major refinishing jobs.

PLIERS:

Used to round off bolt heads. Sometimes used in the creation of blood-blisters.

WISE-GRIPS:

Generally used after pliers to completely round off bolt heads. If nothing else is available, they can also be used to transfer intense welding heat to the palm of your hand.

OXYACETYLENE TORCH:

Used almost entirely for lighting on fire various flammable objects in your shop. Also handy for igniting the grease inside the wheel hub out of which you want to remove a bearing race.

HYDRAULIC FLOOR JACK:

Used for lowering an automobile to the ground after you have installed your new brake shoes, trapping the jack handle firmly under the bumper.

Also-there is no such thing as bad weather, just inappropriate clothing!

THE PRESIDENTS INFORMAL EVENING

BY EILEEN WETZEL

In Attendance: Dan Powell, Mike Manser, Jeff Lumbard, Rich and Liz Stadther, Andy Lindberg, Jim Kriz, Kim and Steve Rixen, Jack Stein, Mike Martin, Gary and Eileen Wetzel, Dick Mathews, Tom and June Moerke, Spook and Britt Johns, John Snyder, and Curt Carlson.

December PIE was fairly quiet, because there was very little old or new business to discuss.

Curt Carlson gave a demonstration on his laptop of the www.mnhealey.com website. He has revised the member roster and photo gallery to combine them together. If anyone hasn't submitted a photo with their car, please send a jpeg to Curt labeled with your name. Also, check out the updated calendar. Curt has put in many hours to create a comprehensive calendar that includes many different car clubs' activities. Don't be afraid to check it out and play around with it a bit.

Besides visiting, many watched the YouTube video "North Dakota Least Visited State". This is the video that the British Iron Society played to promote Rendezvous in Fargo next June. If you haven't seen it, try to make an effort to do so. It is worth the time! See you in January !

DECEMBER PLANNING BREAKFAST

By Geoff Rossi

Saturday, December 4, brought together two-dozen club members in St. Paul. What was the reason? No, it had nothing to do with deciding our next State governor. It was something far more relative to providing our members with excitement, joy, and the meaning of owning a Healey. It was Planning Day!

In a meeting room of the Capitol View Café on Smith Avenue, all present shared breakfast. Then it was down to the business of the day. Within an hour and a half, activities for 2011 were set. They range from Wine & Cheese Parties, Spring and Fall Driving Tours, a Rendezvous, a Conclave, the always anticipated Hill Climb, some Tech Sessions thrown in, and much much more. Adding in the InterMarque events, you will find a destination to drive to nearly every week of the summer.

What was impressive was the readiness of volunteers to step-up to plan and/or host a function. In some cases, members do multiple events. There was an added incentive – Eileen presented a mystery package to each volunteer. Someone left with four. Now that's commitment!

The accomplishment of the morning was a calendar with lots of event days. Every member should find something of interest, be it driving or social. There will be no excuses for not putting some miles on the odometer this coming year!!
Healey On!

Those in Attendance: Dave Herreid, Andy Lindberg, Steve & Kim Rixen, Dick Mathews, Scott McQueen, Mike Martin, Tom & June Moerke, Chuck & Jean Norton, Barb & Dale Martin, Mike & Gloria Lynch, Gary & Barb Ronning, Jim Kriz, Geoff & Diane Rossi, Gary & Eileen Wetzels, Greg Lauser and Tom Hazen.

Technical Tip - Torque Number 1

By Steve Rixen

This is one of, well, how many I am not sure, but this is the first article that will be concerned with good torque practices. In later articles I will talk more in depth about fastener grades & types, torque wrench types and proper use.

A torque table, which appears immediately below, is suitable for clipping, enlarging as desired or required by aged eyes, and attaching to a handy surface in your shop. Use the Torque Table to ascertain the appropriate torque to apply if the fastener you are installing does not appear in the Torque Specifications of your Bentley Austin-Healey Repair Manual.

Foot Pounds / Inch Pounds

Torque Table					
Bolt Shank Dia	Grade 2	Grade 5	Gr 5 Lubed	Grade 8	Gr 8 Lubed
1/4-20 UNC	5 60	8 96	5 60	12 144	7 84
1/4-28 UNF	6 72	10 120	6 72	14 168	9 96
5/16-18 UNC	11 132	17 204	10 120	25 300	15 180
5/16-24 UNF	12 144	19 228	12 144	27 324	16 192
3/8-16 UNC	20 240	30 360	19 228	43 316	27 324
3/8-24 UNF	23 276	35 420	21 256	49 588	30 360
7/16-14 UNC	32 384	50 600	30 360	70 840	42 504
7/16-20 UNF	36 432	55 660	33 396	78 936	47 564
1/2-13 UNC	50 600	75 900	45 540	105 1260	63 756
1/2-20 UNF	55 660	90 1080	54 648	120 1440	72 864

The torques identified here are for the appropriate **thread and grade** of nuts torqued onto similarly graded bolts or studs. Good Torque practice requires the fastener threads to be clean and if possible lightly lubricated. If you don't know the shank diameter, invest in a low buck vernier or dial caliper and measure the diameter of the fastener shank.

If the fastener is a bolt being torqued into a threaded hole there will be additional friction which will require additional torque be applied. Additional thread engagement and shank interference will require a percentage of additional torque be applied. (You judge if no information is available in the torque specs.)

The typical fastener on an Austin-Healey or MG is fine thread or UNF. (Triumphs are about the only British car which normally uses course threads in any quantity. Figures doesn't it?) British Standard or Whitworth fasteners have shank sizes close to those above and threads which are close to fine thread, British Standard Fine or BSF and should be torqued to nearly those above.

Grade 5 should be the assumed grade for the typical original British bolt. If your bolt has been replaced, it will be a grade 0 to 2 if it has no marks on it. If the head of the bolt has 3 lines, (usually equally spaced around the bolt 120 degrees between lines) it is a grade 5 and if it has eight lines it will be a grade 8. More Torque next time.

List Favorite Suppliers & Automotive Specialists on Angie's List

Minnesota Austin-Healey Club members who want to help the Austin-Healey Club of America avoid another national dues increase soon, may do so by taking a few moments to list their favorite classic sports car suppliers and mechanical consultants on Angie's List.

Angie's List is starting a new Classic Cars initiative and seeks input from clubs around the country that can be recommended to those who consult Angie's List for recommendations. Each verified report can earn \$5 for the Austin-Healey Club of America if you designate it as your charity. Those who already have done so, say it takes about 3-5 minutes to complete a report and receive verification that the charity they designated will receive \$5 per report. You may provide more than one report, and each one verified earns AHCA \$5. Here's how to do it.

1. Go to <https://www.angieslist.com/AngiesList/review/charitablereports.aspx>

It is very simple to submit a report. There are big buttons that say "continue" and lots of prompts if you leave anything out.

2. When you click on the link above, you'll be prompted to set up a profile, including a password. Angie's List does not accept anonymous reports and requires a valid email address as part of the reporting process.

3. Select or type in Austin Healey Club of America when it asks for a charitable organization and follow the instructions.

4. Next, you'll be asked for a provider name. It is very likely that your providers are not on the List yet, so you can click "add" to add a provider.

5. When you add a provider, you'll be asked for their contact information. There are a few required fields here...like the kind of information you'd find on a business card. You'll be asked to choose some categories for the service provider (i.e. alternators, painting, etc.)

6. You'll next be taken to the report page, where you're asked to give grades via radio buttons and you're able to write comments about your experience.

7. Click submit. This will prompt an email to be sent to the email address you entered before. Your report will not be submitted until you verify your email address.

Once you verify your address, the report will be submitted and you can leave another report. This may seem like a lot of steps, but it's pretty quick...and once you've submitted your first report, it's very easy to go back and do more!

Wine & Cheese with Hors d'oeuvres if You Please !

Over the river and through the Wisconsin woods to Lauser's house we'll go from 1-4:30 p.m. on Sunday, January 30 for wine, cheese and hors d'oeuvres.

So grab your favorite bottle of wine, cheese or finger food to share with others who find their way through the snowdrifts to W12349 694th Ave. north of Prescott, Wisconsin. Nancy and Greg promise to put an extra log on the fire that day to assure your comfort, and there will be fun and games for everyone. Bring your thinking caps.

For those who don't use Garmins or TomToms, here are some directions:

From I-94 in Hudson:

Take Exit 2 (Carmichael Road) at the top of the hill up from the St. Croix River and turn right at the stoplight. Carmichael Road becomes County Road F. Follow it south for approximately 11 miles to Pierce County Road MM. There is a St. Croix County Road MM about 4 miles south of Hudson, but don't be fooled and continue south on County Road F. (We mentioned you'd need your thinking cap, didn't we?)

On Pierce County Road MM, turn left for about four blocks, then turn right onto 1230th Street (You'll see a sign for Highlands Golf Course where you turn onto 1230th). Two blocks later turn right onto 694th Ave. (just past the mailboxes). Greg & Nancy can be found at the third house on the left. Be careful because 694th is a one-lane road and the drifts are plenty. Nearby parking will be at a premium, so carpool if you can.

From I-494 at the Wacouta Bridge:

Take U.S. 61/U.S. 10 south toward Hastings approximately 15 miles. At stoplight just north of Hastings (there will be a Holiday gas station on the southeast corner of the intersection), turn left onto U.S. 10 toward Prescott. At the stoplight just across the bridge into Prescott, turn left again on U.S. 10 to the top of the hill. At the next stoplight, turn left onto Wisconsin 29/35 for 1.5 miles and turn left onto County Road F for another 1.5 miles. Turn right onto Pierce County Road MM for four blocks, turn right onto 1230th Street for two blocks and right again onto 694th Ave. Greg & Nancy can be found at the third house on the left. Be careful because 694th is a one-lane road and the drifts are plenty. Nearby parking will be at a premium, so carpool if you can.

See you and your favorite beverage
and treat on January 30!!
